Challenges for Premix Industry - Asia and Africa

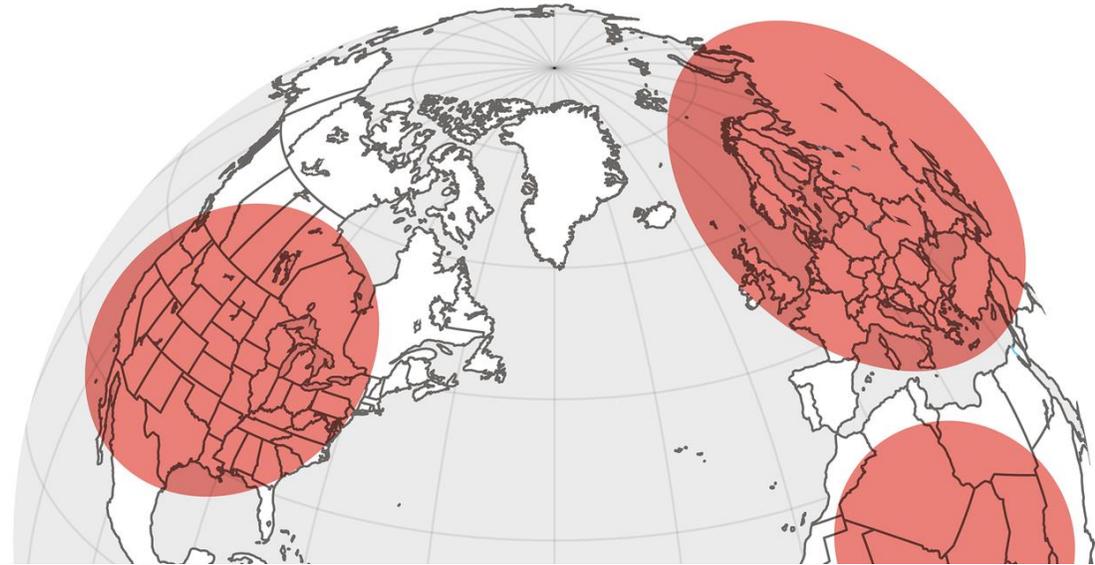

At the start of the Pandemic...

Operational Challenges

- Production
- Supply Chain
- Logistics
- Payments

Customer connect

Challenges for national regulators

Actions taken and recommendations to overcome the challenges

By premix supplier

Availability:

- Maintain long term inventory of key ingredients
- Collaborate with your dependable suppliers

Local stocks:

- Stock and sale in destination markets
- “Make in” concept

By customers

Availability:

- Safety stocks of premix
- Enter into long term contracts

Virtual connect

- Attending Webinars
- Virtual meetings with suppliers

By National Regulators

- Enhance the testing and monitoring capabilities
- Collaboration between Government agencies and private sector
- Encourage local production and import substitution wherever possible

THANK YOU
